

Online Facilitation

Overview

Online meetings and learning can benefit from the application of a facilitation approach as much as face to face sessions can.

This course bridges the principles of facilitation and adult learning into an online environment. However, the learning is not theoretical, as you will explore models, tools and their application as part of the process.

Participants

- Stakeholder and community managers
- Stakeholder and community engagement officers
- Change managers
- Project managers
- Communications officers

Learning Outcomes

- Understanding key principles of adult learning and how they apply to an online environment
- Understanding key principles of facilitation and how they apply to an online environment
- Profiling the use of different online engagement tools
- Practising the application of these tools on a current project
